EXPERIENCE

1. Company Name : AMDOCS Philippines Inc. (Apr 2018 to Present)
Position Title : System Analyst
Work Description :

- Led end-to-end analysis, design, development, integration, and support of large-scale telecom billing systems, ensuring high availability, accuracy, and regulatory compliance across mission-critical platforms.
- Designed and implemented end-to-end system integrations between billing platforms and multiple upstream/downstream systems including CRM, order management, mediation, OSS, reporting systems, enabling seamless data flow and operational efficiency.
- Acted as solution architect and technical lead for complex billing enhancements, troubleshooting critical production issues, performing root cause analysis, and driving long-term system stability and performance improvements.
- Delivered full SDLC ownership: requirements gathering, solution design, development, testing, production deployment, and post-go-live support.
- Played a key role in legacy system transformation, system migrations, data transformation, and architecture redesign for next-generation systems.
- Leveraged AI-powered tools across the entire SDLC to accelerate:
    - Business requirement analysis
    - Code generation and refactoring
    - Debugging and root cause analysis
    - Documentation and knowledge base creation
    - Increased development and delivery efficiency by adopting AI-driven tools for overall solution quality.
- Served as technical mentor and doing knowledge transfer both legacy applications and newly developed tools to rapidly upskill team members.
- Collaborated closely with product owners, architects, QA teams, DevOps and business analysts to deliver high-impact solutions aligned with business objectives.
- Provided L2/L3 production support, handling high-severity incidents and performance degradation issues while maintaining strict SLA compliance.
- Advising the team on optimized methods for preparing and managing SQL scripts during technical/script reviews to improve overall performance & efficiency.

Skills: System Development · DevOps · Bash/Shell scripting · PlSql · Oracle DB Scripts tuning · RBMS · Java · Production Support · Python (Programming Language) · Business Requirements · Solution architect · System Configuration · Software System Analysis · ServiceNow · Jira · Automated Processes · Batch Processing · Maintainability · Extractions · Shell Scripting · JavaScript · WorkPoint

(Workflow) · Analytical Support · Scripting · Software Development Life Cycle (SDLC) · Software Engineers · Leverl 3 Support · HTML · Amazon Web Services (AWS) · Data Migration · Software Systems Engineering · Manual Development · Teaching · Billing Systems · Generative AI Tools

2. Company Name : Philippine Long Distance Telephony (Mar 2011 to Apr 2018)
Position Title : Software Engineer
Work Description :

- Performed end-to-end configuration of complex Billing System components, including Products, Usage, Journals, Extended Data, and Parameter configurations, ensuring alignment with business and operational requirements.
- Analyzed Business Requirement Specifications (BRS) and translated them into scalable, efficient technical solutions that support billing and customer management processes.
- Developed and optimized Shell scripts and PL/SQL programs, executing thorough unit testing to validate functionality before turnover to QA/testing teams.
- Provided comprehensive testing support across the SDLC, including System Acceptance Testing (SAT), Integration Acceptance Testing (IAT), User Acceptance Testing (UAT), and Production Integration Testing (PIT).
- Delivered Level 3 support for Billing and BSS platforms by performing root-cause analysis, resolving production issues, and implementing permanent corrective actions.
- Executed scripts required for audit, compliance, and operational reporting, ensuring data integrity and accurate traceability.
- Performed report extractions and data analysis to support business operations, performance tracking, and system validation activities.

Skills: Production Support · Business Requirements · Maintainability · Extractions · Analytical Support · Scripting · Software Engineers · Software Systems Engineering · Manual Development · Billing Systems

3. Company Name : PC Express Information Technology Inc.
Jul 2010 to Mar 2011
Position Title : RMA Coordinator
Work Description :

- Verified customer claims and determined warranty entitlement for returned items through detailed product assessment and diagnostics.
- Generated and managed RMA reference numbers, ensuring accurate documentation and smooth processing of returns.
- Updated product status in the POS System, converting items from “good” to “defective” after completing multiple validation tests.
- Performed basic hardware repairs and provided technical support to resolve customer issues efficiently.

- Prepared detailed reports on defective or damaged items, including those with compromised packaging, to support vendor and internal audits.
- Assembled custom computer units based on customer specifications.
- Provided telephone-based technical assistance, advising customers on PC component compatibility and troubleshooting.
- Handled sales and reservations of computer parts via telephone, contributing to daily store revenue and customer satisfaction.

Company Name : PC Express Information Technology Inc.
Dec 2009 to Jul 2010
Position Title : Inventory Clerk
Work Description :

- Conduct physical count of stocks daily.
- Maintain the availability of stocks of different brand based on the requirement of the warehouse and sales performance of each merchandise.
- Thoroughly check all merchandise items before storing based on the document presented.
- Matching the logged item released versus the releasing summary, to ensure that item is totally released in the POS or not.

3. Company Name : Isabela State University
July 2009 – September 2009
Position Title : Programmer (Part-time Job)
Work Description :

- Correct errors by making appropriate changes and then rechecking the program to ensure that the desired results are produced.
- Conduct trial runs of programs and software applications to be sure they will produce the desired information and that the instructions are correct.
- Compile and write documentation of program development and subsequent revisions, inserting comments in the coded instructions so others can understand the program.
- Write, update, and maintain computer programs or software packages to handle specific jobs, such as storing or retrieving data, or controlling other equipment.

SKILLS & INTEREST

Programming Languages

- *Java*
- *JavaScript*
- *Python*
- *Php*
- *PL/Sql*
- *Bash / Shell Scripting*

Databases

- *Oracle*
- *MySQL*
- *Microsoft SQL Server*

- *PostgreSQL*
- Couchbase

Artificial Intelligence & LLM Tools

- *AI Development Tools: Claude (Anthropic), Tabnine, GitHub Copilot, Cursor, Kiro*
- *Generative AI Platforms: ChatGPT, Gemini, Perplexity, Microsoft Copilot*
- *LLM Ecosystems: OpenAI, Ollama*

Operating Systems

- *Microsoft Windows*
- *Unix*
- *Linux*
- *MacOS*

Cloud Technologies

- *Amazon Web Services (AWS)*

EDUCATION

College : ***Bachelor of Science in Information Technology*** (*Graduated*)
Isabela State University, Cabagan Campus – *Cabagan Isabela*
2005-2009
Secondary : Delfin Albano High School – *Cabagan Isabela*
5th Honorable Mention
2000-2004
Elementary : Casibarag Elementary School – *Cabagan Isabela*
